

Wave Sentinel

Fast Patrol Boat

Hull Form

The Wave Sentinel is a sleek and powerful fast patrol boat designed for Alnmaritec by Camarc Limited. The hull design is an advanced double chine form which combines the advantages of finer entry in the forward sections with efficient spray rails to keep the deck dry and to damp motions in heavy seas.

The double chine hull has excellent manoeuvrability and has been proven by the vessels in service to provide excellent seakeeping characteristics even at high speed.

The boat is fitted with sleeping accommodation for up to six persons below decks and seating for three crew and 10 passengers in the main wheelhouse. She achieves a top speed of over 37 knots and is truly an awesome sight.

Principal Dimensions

Length overall	20.2m
Beam overall	5.0m
Displacement	31t
Draft	1.5m
Maximum speed	37kts

Main Features

- Sleeping accommodation for six
- Generator
- Air conditioning

Main Equipment

- 2 x 10V MTU 1200bhp Marine Diesel Engines
- 2 x CJR 5 Bladed high performance propellers

Certification

- MCA Category 2
