Fast Patrol Boat

Hull Form

This Fast Patrol Boat hull form is based upon a proven design by Camarc Ltd., and provides fast and efficient running combined with excellent sea-keeping.

The double chine hull combines a number of advantages; finer entry in the sections, efficient spray rails to keep the deck dry and to damp motions in heavy seas, a more sea-kindly shape in the slamming area, with a chine shape at the aft end to give stability in following seas. The double chine shape also exhibits economical operation at cruising speed.

The boat is designed as a fast interdiction patrol boat for operation in and around terminals and harbours – she has a terrific turn of speed, she carries an array of equipment and can be fitted with ballistic armour.

Principal Dimensions

Length overall:	11.99m
Beam overall:	3.7m
Displacement (light):	8.4t
Draft (light):	0.67m
Speed (light):	38kts

Main Features

- Fischer Panda 7.7kva generator
- Ballistic armour
- WC
- Galley
- Water cannon
- LRAD system

Main Equipment

- 2 x 480bhp Cummins QSB Marine Diesel Engines
- 2 x Ultra Jet 305 Water jets

Certification

- MCA Workboat Standard Cat 3
