

# Wave Patroller

## Fast River Patrol Craft

### Hull Form

The Wave Patroller is an aluminium alloy monohull based upon the 'Wave Line' hull form which maximizes hull-planing area reducing the speed at which the boat planes, giving low wash and high performance. The shallow draft and the grounding reinforcement fitted as standard along the full hull length make this boat ideally suited for river and estuary operations, and it is fully capable of regular beaching. It is powered by twin diesels and waterjets which give it excellent manoeuvrability and the wheelhouse/upper deck arrangement can be tailored to suit individual customer needs.

### Principal Dimensions

Length overall:	<b>14.1m</b>
Beam overall:	<b>4.2m</b>
Displacement (light):	<b>12.0t</b>
Draft (light):	<b>0.4m</b>
Speed (light):	<b>25kts</b>

### Main Features

- Port and starboard 800 litre fuel tanks
- Marine toilet with holding tank
- Galley and sink
- Freshwater system (200 litres)
- Substantial perimeter fendering
- Seating for three crew and five passengers

### Main Equipment

- 2 x 350–400bhp marine diesel engines
- 2 x 291 waterjets
- Comprehensive navigation and communications package

### Certification

- Lloyds Hull Structure Certificate
- MCA Workboat Standards
