

Wave Wanderer

General Purpose Launch

Hull Form

This versatile all-welded aluminium alloy monohull has a well proven hull form and is designed as a general purpose launch suitable for harbour work, sea safari or ferry operations. It is fast, rugged and seaworthy and can be readily modified to suit specific operational requirements.

The craft illustrated is a fast short-haul passenger boat designed to carry birdwatchers to an island off the north west coast of Scotland. To maximize the use of the boat, a 750lb line hauler is fitted to allow the craft to perform its secondary role as a fast creel boat. The 900 version of the boat is fitted with a single diesel inboard and stern drive whereas the 1000 version has twin diesels and waterjets.

Principal Dimensions	900	1000
Length overall:	9.0m	10.1m
Beam overall:	3.0m	3.2m
Displacement (light):	5.0t	5.0t
Speed (light):	28kts	25kts

Main Features

- Propulsion options are available which include single or twin engines and waterjets, stern drives or conventional shaft and propeller
- Wheelhouse can be arranged forward or aft
- A small saloon can be incorporated if required
- Boat can be configured for sea safari, chartering, angling or small ferry operations

Main Equipment (*on illustrated craft*)

- 1 x Volvo Penta 150bhp
- 1 x Volvo Penta stern drive
- Spencer Carter 750lb line hauler

Certification

- Lloyds Hull Structure Certificate
- MCA Workboat Standards
